Supervisor Gloria Molina  
Supervisor Yvonne B. Burke  
Supervisor Don Knabe  
Supervisor Michael D. Antonovich

FROM: Steven J. Golightly  
Director

SUBJECT: **INFORMATION TECHNOLOGY SUPPORT SERVICES MASTER AGREEMENT (ITSSMA) WORK ORDERS FOR THE CHILD SUPPORT SERVICES DEPARTMENT**

This is to notify you of my intent to request the Internal Services Department (ISD) to execute fifteen (15) Work Order extensions through June 30, 2008 for a total of \$2,506,000 under the Information Technology Support Services Master Agreement (ITSSMA) to obtain contractual staff for the Child Support Services Department (CSSD) Information Technology Bureau. Execution of these Work Orders is necessary to allow CSSD's Information Technology staff to continue the support of the ACSES Replacement System (ARS), Los Angeles County's child support case management system, and numerous, ongoing projects that must be completed to effect our transition to the federally mandated statewide child support computer system – the California Child Support Automated System (CCSAS). In accordance with the ITSSMA guidelines, prior Board notice is provided. There is **no net County cost**, as this budget item is fully funded by state and federal funds.

### BACKGROUND

CSSD continues to utilize the ITSSMA process to augment its technical resources and to help the department meet its critical information technology needs. With the technical and programming assistance obtained through ITSSMA Work Orders, the system has continued to successfully perform as it was designed. The ARS system registered collections of over \$494 million last year and assisted the Los Angeles Child Support Services Department to manage almost 500,000 cases, representing 26 percent of the State's child support caseload. As a result of the selection of ARS by the California Department of Child Support Services as the host child support automation system for

*"To Enrich Lives Through Effective And Caring Service"*

Orange and San Diego Counties and the conversion of those counties' caseloads to ARS in April 2002, our system now successfully supports approximately 43 percent of California's child support cases.

In addition to the maintenance and operation of ARS, our technology staff, supplemented by ITSSMA consultants, performs database administration, architects ARS components and supports a number of third-party software products. Just as important, IT staff provides support to the ARS Consortium (the ARS steering committee comprised of representatives from Los Angeles, Orange and San Diego Counties), makes State-mandated or approved ARS enhancements, administers the department's LAN and email system, develops new Web applications, maintains computer hardware and software inventories and provides valuable management information and direct customer (end-user) support.

Moreover, the technology staff will assist with the replacement of ARS by CCSAS. A fully integrated statewide system, CCSAS, is mandated by federal and state legislation. The conversion will be accomplished in two phases. The first phase was recently completed with the successful conversion of Los Angeles County to CCSAS Version 1 on May 1, 2006. A new, enhanced version of CCSAS (known as CCSAS Version 2) will be developed in the second phase, and is currently planned for October 2008. Contract personnel identified in Attachment 1 are required to supplement existing staff and expertise, and will be instrumental in completing critical projects that are required prior to statewide conversion. We believe these contractors are crucial to our efforts to obtain Federal System Certification and the avoidance of millions of dollars in federal penalties.

## **SCOPE OF WORK**

The Work Orders shown on the attached list will support the following projects in this department:

- California Child Support Automated System
- Multiple DAC (Distribution Account) Project
- Enhancement to the CIIP process (Bi-directional Data Exchange)
- Enhancement to the Service Vendor Process (Automatic Return File)
- Multiple Wage Assignment for Multiple Employers
- Interface with Work Number (Locate Tool)
- Interface with "Cell Phone" Providers (Locate Tool)
- Registrar Recorder Interface (for San Diego County)

- Management and Administrative Systems
- Network Strengthening and Isolation
- Storage Area Network

These projects are required to facilitate CCSAS implementation, maintain the current ARS child support case management system, comply with state and federal reporting and program requirements, facilitate LAN administration, strengthen computer security, maintain service levels to Consortium members, enhance customer service to our constituents and support departmental administrative functions. Please note that these projects conform to our Business Automation Plan as required by the Chief Information Officer.

## **JUSTIFICATION**

Over the past year, CSSD has reduced its vendor need by three contract positions, from 18 to 15. CSSD continues to hire permanent County personnel to fill its technology positions and successfully replaced two more contract positions with permanent staff in FY 06/07. Unfortunately, County salaries offered for many of our most specialized positions deter our ability to attract qualified applicants.

It should be noted that the need for many of these work orders will be greatly diminished in FY 08/09 with the implementation of CCSAS. Once the new statewide system is operative, most, if not all, work orders will be terminated as many of the functions of the local staff will be centralized and operated by DCSS.

Until the state's automated child support system is completed and ARS is phased out, CSSD will continue to require the assistance of these ITSSMA contractors to supplement our existing IT staff. Several of our consultants perform highly specialized, technical and database functions and have extensive knowledge of ARS. This is especially true for staff performing database administration, systems programming, and Call Center support. Additionally, several consultants will directly participate in CCSAS implementation and will be essential to our overall effort to obtain federal certification.

The department recognizes that a reliance on contract staff is problematic, but the inability to attract comparably qualified permanent replacements with available items remains a reality. Using the ITSSMA consultants to supplement current CSSD technology staff will allow the department to maintain current service levels, meet accelerated State timelines, and enhance our current pool of talent and expertise.

The services received under the Work Orders are essential to the effective functioning of our department and to our successful transition to the new statewide system. We rely heavily on automation to manage our massive caseload, locate parents and their

Page 4

assets through interfaces with other federal, state and local databases, and for communication within our department and with other jurisdictions. Further, ARS requires constant refinements and modifications to keep pace with regulatory changes and the ever-evolving needs of the department. Hence, having experienced contract staff with first-hand knowledge of our operations and business systems is necessary to avoid the slowdown in work or the delay in collecting and distributing child support for the children and families of Los Angeles County.

### **FISCAL IMPACT**

The total amount of the Work Orders for Fiscal Year 2007-08 is budgeted at \$2,506,000. The amount to be expended for the Work Orders will be fully offset by state and federal revenue. There is **no net County cost**.

### **CLOSING**

Consistent with ITSSMA policies and procedures, we are informing your Board of our intention to ask ISD to execute these Work Order extensions. In two weeks time, the department will instruct ISD to proceed with the execution of the ITSSMA Work Order extensions. If you or your staff members have any questions or comments, please do not hesitate to contact me or David Jacobson of my staff at (323) 832-7191.
